### ANCAP Safety Rating: FORD EVEREST (2015 - onwards)

Frontal offset test at 64km/h

This ANCAP	safety rating applies to:	
Make / Model	Ford Everest	
Year Range	2015 - onwards	
Variant(s)*	All variants	
Vehicle Type	Large SUV	

The tested model of Ford Everest was introduced in Australia and New Zealand in October 2015. This rating applies to all variants.

Dual frontal, side chest, side head airbags (curtains) and driver knee airbags are standard. Electronic Brake Distribution (EBD) and Emergency Brake Assist (EBA) are also standard. Advanced seat belt reminders are fitted to front and second row seats. Advanced crash avoidance features are available on higher-priced variants.

### Injury Outcomes.

### Frontal Offset Side Impact & Pole# Driver Passenger

### Whiplash Protection

Driver

<sup>#</sup> Head protection only.

Airbags	Dual Frontal, Side, Head, Knee
Frontal Offset Test	15.38 (out of 16)
Side Impact Test	16.00 (out of 16)
Pole Test	<b>2</b> (out of 2)
Whiplash Protection	Good
Pedestrian Protection	Acceptable
ESC	Standard
Seat Belt Reminders	<b>2.6</b> (out of 3)
Overall Score	35.98 (out of 37)
ANCAP Safety Rating	****
Rating Year^	2015

### Occupant Protection.

Test Results Summary.

#### Frontal Offset Test

Each body region is scored out of 4 points

Head / neck: 4.00 points 3.77 points Chest: 4.00 points Upper legs: Lower legs: 3.61 points

The passenger compartment held its shape well in the offset test. Pedal and steering wheel displacements were well controlled. Driver and passenger contact with the airbags was stable. All doors remained closed during the crash. After the crash all doors could be opened with normal effort.

### Side Impact Test

Each body region is scored out of 4 points

Head: 4.00 points Chest: 4.00 points Abdomen: 4.00 points Pelvis: 4.00 points

The side impact test normally used by ANCAP simulates a small car striking the driver's door of the test vehicle. Experience shows that large vehicles like the Everest can be expected to perform well in this test. ANCAP has adopted a policy of awarding these types of vehicles a default score of 16 points (out of 16).

### Pole Test

Scored out of 2 points

Score: 2.00 points

The vehicle was eligible for a side pole test because it has side curtain airbags. The vehicle scored the maximum 2 points for head protection in this test.

### Whiplash Protection Test

Whiplash protection is assessed to the RCAR Protocol

Geometric test: Good Dynamic test: Good Overall whiplash rating: Good

ancap.com.au Page 1 of 3

GOOD

POOR

**ACCEPTABLE** 

MARGINAL

## ANCAP Safety Rating: FORD EVEREST (2015 - onwards)

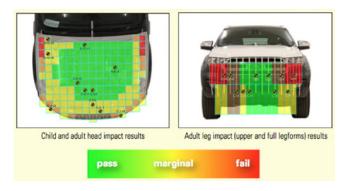

### Pedestrian Protection.

#### **Pedestrian Test**

Scored out of 36 points

Adult & child head impacts: 16.93 points Upper leg impacts: 2.83 points Lower leg impacts: 5.26 points

The vehicle scored 25.02 out of 36 points (Acceptable). While the central area of the bonnet provided predominantly good results, there were some poor results at the base of the a-pillars and for the upper legs towards the outer edges of the bumper. (v8.0)

### Score Deductions.

Deductions from frontal offset test scores
Head / neck: No deductions
Chest: No deductions
Upper legs: No deductions
Lower legs: No deductions

Deductions from side impact test score Chest: No deductions

**Deductions from pole test score** 

Head: No deductions.

### Other.

Independent assessment has shown that the 2015 ANCAP safety rating of this vehicle only is retained when fitted with:

Ford-supplied steel bullbar Part No. EB3B-17A912-##

ANCAP was provided with information to show that, with the Ford steel bullbar fitted, the pedestrian protection rating drops to "marginal". While this is still adequate for a 5-star safety rating the fitting of rigid metal bullbars does increase the serious injury risk for struck pedestrians, compared to Everests without the bullbar fitted.

### Safety Features & Technologies.

Descriptions of each of these safety features and safety assist technologies (SAT) and detail on fitting requirements for each star rating level can be found at **ancap.com.au**.

Reversing collision avoidance S
Roll stability system S
Rollover warning S
Smart key V
Speed assist system (driver-set speed limiter)
Trailer stability control
Tyre pressure monitoring system (TPMS)

These specifications are subject to change. Please check with the manufacturer for the latest specifications.

S = Standard on all variants.

**O** = Optional on base variant. May be standard on higher variants.

V = Not available on base variant but standard or optional on higher variants.

**X** = Not available on any variant.

**E** = Available in Europe / USA but not available on any Australasian variant.

<sup>+</sup> Steering column and pedal movements are measured relative to the driver's seat.

<sup>^</sup> The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and may be based on the year in which a new vehicle model is first launched into the Australian and/or New Zealand markets; the year in which the vehicle was tested (if tested by Euro NCAP); or, for vehicles which hold an existing ANCAP safety rating, the year in which the rating was updated (or earlier applicable year).

Assessment Details.

<sup>\*</sup> ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model. For further information about the application of ANCAP safety ratings to model variants, see the ANCAP Variant Policy.
