

ANCAP Safety Rating

ISUZU D-MAX (from November 2013)*

Test Vehicle.

Variant:	Isuzu D-Max 4x4 Crew Cab
Kerb Mass:	1960 kg
Built:	2013
Engine:	3.0 litre diesel
Category:	Utility / Van
Variant Applicability*:	Crew Cabs only: - 4x4 built from Nov 2013 - 4x2 High-Ride built from Nov 2014

Frontal offset test at 64 km/h

Airbags	ESC	Frontal Offset	Side Impact	Pole	Whiplash	Pedestrian	Seat Belt Reminders	Overall Score	ANCAP Safety Rating
Frontal + Side + Head	Standard	13.58 (out of 16)	16.00 (out of 16)	2 (out of 2)	GOOD	MARGINAL	2 (out of 3)	33.58 (out of 37)	★★★★★

The upgraded D-Max was introduced in Australia and New Zealand late in 2013. This 5 star ANCAP safety rating applies to D-Max 4x4 Crew Cab variants built from November 2013 and 4x2 High-Ride Crew Cab variants built from November 2014. A separate 4 star ANCAP safety rating applies to all other D-Max variants.

Dual frontal, side chest and side head airbags (curtains) are standard. Antilock brakes (ABS), electronic brake distribution (EBD) and electronic stability control (ESC) are also standard. Advanced seat belt reminders are fitted to both front seats.

In the ANCAP frontal offset crash, test driver chest and leg protection was acceptable. Passenger chest and leg protection was also acceptable. All driver injury values were good in the side impact crash conducted by Euro NCAP. Head protection in the Euro NCAP side pole test was good.

OCCUPANT PROTECTION

Frontal Offset Test.

Each body region is scored out of 4 points

Head / neck:	4.00 points
Chest:	2.80 points
Upper legs:	4.00 points
Lower legs:	2.78 points

The passenger compartment held its shape well in the frontal offset test. Pedal and steering wheel displacements were well controlled. Driver and passenger contact with the airbags was stable. All doors remained closed during the crash.

Side Impact Test.

Each body region is scored out of 4 points

Head:	4.00 points
Chest:	4.00 points
Abdomen:	4.00 points
Pelvis:	4.00 points

The side impact test simulates a small car striking the driver's door of the vehicle under test. It is based on a regulation test but the regulation does not apply to vehicles with a high seat height like the D-Max. Experience shows that such vehicles can be expected to perform well in this test and the D-Max scored full marks.

Pole Test.

Scored out of 2 points

The vehicle was eligible for a side pole test because it has side curtain airbags. The vehicle scored the maximum 2 points for head protection in this test.

Whiplash Protection Test.

Whiplash protection is assessed to the RCAR Protocol

Geometric test:	Good
Dynamic test:	Good
Overall whiplash rating:	Good

PEDESTRIAN PROTECTION

Pedestrian Test.

MARGINAL - Scored 18.37 out of 36 points

Child head impacts: 6.23 points
 Adult head impacts: 6.14 points
 Upper leg impacts: 0.00 points
 Lower leg impacts: 6.00 points

In those areas likely to be struck by a pedestrian's lower leg, the protection was good. The front edge of the bonnet offered poor protection, which is where a pedestrian's upper leg would contact. In most areas likely to be struck by the head of a child and an adult, the protection was mostly marginal and poor.

(Tested by Euro NCAP v5.3)

OTHER

Independent assessment has shown that the 2013 ANCAP safety rating of **this vehicle only** is retained when fitted with:

- Isuzu steel bullbar Part No. 5867605811
- Isuzu alloy bullbar Part No. 5867605791

* For information about the application of ANCAP ratings to model variants see the ANCAP Variant Policy. In brief, ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model.
