## Adult Occupant Protection.

#### **Full Width Frontal Test**

[Not applicable in 2014]

#### Frontal Offset Test

Each body region is scored out of 4 points

Head / neck:	4.00 points
Chest:	3.09 points
Upper legs:	4.00 points
Lower leas:	3.78 points

The passenger compartment held its shape well in the frontal offset test. Pedal and steering wheel displacements were well controlled. Driver and passenger contact with the airbags was stable. All doors remained closed during the crash.

#### Side Impact Test

Head: Chest:

test.

Each body region

on is scored out o	of 4 points	
4.00 points	Head:	4.00 points
4.00 points	Chest:	3.61 points

Pole Test

4.00 points 3.73 points Abdomen: Abdomen: Pelvis: 4.00 points Pelvis: 4.00 points Good protection was provided for the driver in the side impact test. Driver chest and abdomen protection was acceptable in the side pole

### Whiplash Protection Test

Front / Rear:	1.52 points / 0.69 points
AEB (City):	2.81 points

# Scaled scores. Total test score out of 16.00 points

(2015 - onwards)

## **Child Occupant Protection.**

### **Crash Test Performance**

18 month old child:	12.00 points
3 year old child:	10.60 points

#### **Child Safety Features**

Safety features:	6.00 points
Installation check:	12.00 points

**NOTE:** The child restraints tested by Euro NCAP are relevant to the European market. For Australasian consumers, this information should be used as a guide to vehicle features only. For more detailed information about Australian child restraints visit childcarseats.com.au.

## **Pedestrian Protection.**

#### **Pedestrian Test**

Scored out of 36 points

Adult & child head impacts:	19.20 points
Upper leg impacts:	0.00 points
Lower leg impacts:	5.94 points

This vehicle scored 25.15 out of 36 points (Acceptable). The bumper offered good/adequate protection to pedestrians' legs but the front edge of the bonnet showed poor protection in all areas tested. The Discovery Sport has a pedestrian-protection airbag under the bonnet. Euro NCAP assessed the protection offered to a pedestrian's head with the system deployed. Test results were predominantly good or adequate. (Tested by Euro NCAP v7)

\* ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model. For further information about the application of ANCAP safety ratings to model variants, see the ANCAP Variant Policy.

^ The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and may be based on the year in which a new vehicle model is first launched into the Australian and/or New Zealand markets; the year in which the vehicle was tested (if tested by Euro NCAP); or, for vehicles which hold an existing ANCAP safety rating, the year in which the rating was updated (or earlier applicable year).
