Dual frontal, side chest and side head airbags (curtains) and a driver knee airbag are standard. Antilock brakes (ABS), electronic brake distribution (EBD) and electronic stability control (ESC) are also standard. Advanced seat belt reminders are fitted to all seats.

In the offset crash test driver chest and leg protection was acceptable. Passenger leg protection was also acceptable in this test. In the side impact crash test driver protection was good. Head protection in the side pole test was good.

OCCUPANT PROTECTION

Frontal Offset Test.

Each body region is scored out of 4 points

Head / neck: 4.00 points
Chest: 3.50 points

PEDESTRIAN PROTECTION

Pedestrian Test.

ACCEPTABLE - Scored 19.71 out of 36 points

Child head impacts: 9.00 points
Adult head impacts: 4.52 points
Upper leg impacts: 0.19 points
Lower leg impacts: 6.00 points

The bumper provided good protection to pedestrians' legs, scoring maximum points in Euro NCAP's tests. However, the front edge of the bonnet was poor in nearly all of the areas tested. In most areas likely to be struck by the head of a child the bonnet offered a good level of protection but, while good in places, was rated as poor or marginal in most areas where an adult's head might strike. (Tested by Euro NCAP v5.3)

^{*} For information about the application of ANCAP ratings to model variants see the ANCAP Variant Policy. In brief, ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model.
